Profile

I own the PUBG Partner Program for PUBG West end to end: around 350 creators (around 280 active in a typical month) across EMEA, Türkiye, CIS, North America and Latin America, on PC and console, across Twitch, Kick, YouTube and TikTok. I partner directly with HQ on programme direction and approvals, and I build the tooling the programme runs on.

Everything AI-assisted has a written source and a human check before it ships.

AI and tools

Built the tooling that runs the programme: an automated weekly Partner sentiment report (about three hours of work cut to about five minutes of review), an automated player-report intake and triage system that I designed and operate, and a Partner dashboard that replaced spreadsheet-based Partner management.

Own the programme end to end across EMEA, Türkiye, CIS, North America and Latin America: creator selection, rules and benefits, quarterly activity audits, campaigns and Partner support.
